OTRS package installation

The Conference Rooms package for OTRS (`.opm` file) is responsible for installing all necessary system components including:

- Database tables
- Dynamic Fields
- Backend files
- Frontend files

To install the package, login to your OTRS system and open the *Admin / Overview* page.

Find the Package Manager.

You can use the **Filter for Items** field to narrow down visible options.

Please note that the installation process might take a while. As long as the installation process is not completed the yellow bar will be displayed on top of the page.

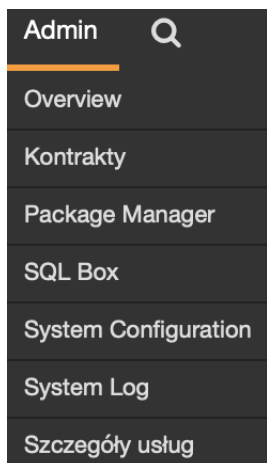

The configuration is being updated, please be patient...

Dynamic Fields Configuration

The correct configuration of dynamic fields will allow users to see more information about reservations on the ticket view.

Creating a hyperlink for ReservationID dynamic field

Open the *Admin* dropdown menu and pick *Overview*.

Go to *Dynamic Fields* in *Processes & Automation* section

Click on the ReservationID row in the list

Add the URL for reservation in Show link field

Example:

```
https://example.com/roomReservations/Dashboard?reservationId=[ % Data.ReservationID | uri  
%] &sessionId=[ % Env( "SessionID" ) %]
```

Click *Save and finish*.

General

★ Name:

ReservationID

Validity: valid

Must be unique and only accept alphabetic and numeric characters.

★ Label:

Linked reservation

Field type: Text

This is the name to be shown on the screens where the field is active.

★ Field order:

10

Object type: Ticket

This is the order in which this field will be shown on the screens where is active.

Text Field Settings

Default value:

This is the default value for this field.

Show link:

https://example.com/roomReservations/Dashboard?reservationId=[% D:

Here you can specify an optional HTTP link for the field value in Overviews and Zoom screens.
If special characters (&, @, :, /, etc.) should not be encoded, use 'uri' instead of 'uri' filter.
Example: http://some.example.com/handle?query=[% Data.Field1 | uri %]

Link for preview:

If filled in, this URL will be used for a preview which is shown when this link is hovered in ticket zoom. Please note that for this to work, the regular URL field above needs to be filled in, too.

Check RegEx:

Here you can specify a regular expression to check the value. The regex will be executed with the modifiers xms.
Example: ^[0-9]\$

Add RegEx:

Adding dynamic fields visibility to Ticket view

Open the *Admin* dropdown menu and pick *System Configuration*.

In the search bar type `AgentTicketZoom###DynamicField` and click **Enter**.

We recommend setting visibility for the following dynamic fields:

- ReservationID
- ReservationAdditionalDescription
- ReservationNumberOfPeople
- ReservationIsManagerPresent

1. Add new entry by clicking the **Plus** sign.
2. Enter **Dynamic Field Name** (e.g. ReservationID) and enable it.

3. Repeat this process for other fields

Save the settings by clicking checkmark.

The screenshot shows a configuration window titled "Ticket::Frontend::AgentTicketZoom###DynamicField". It contains a table with five rows, each representing a dynamic field. Each row has a text input field on the left and a dropdown menu on the right. All dropdown menus are set to "1 - Enabled".

Field Name	Value
OPWorkPackageld	1 - Enabled
ReservationAdditionalDescription	1 - Enabled
ReservationID	1 - Enabled
ReservationIsManagerPresent	1 - Enabled
ReservationNumberOfPeople	1 - Enabled

On the right side of the window, there is a text box that says: "Dynamic fields shown in the sidebar of the ticket zoom screen of the agent interface."

Settings deployment

Every changes in OTRS configuration needs to be deployed.

If you have undeployed settings you should see a yellow bar under the main menu. Click it and you will be forwarded to the deployment page.

You have undeployed settings, would you like to deploy them? →

If you don't see a yellow bar go to the *Admin / System configuration / Deployment*.

The screenshot shows the "Deployment" page in the OTRS Admin interface. It is divided into two main sections: "Actions" and "Navigation".

Actions: This section contains four buttons: "Deployment" (highlighted with an orange border), "Settings I'm currently editing", "My favourite settings", and "Import & Export".

Navigation: This section contains a search bar with the text "Intalio Conference Rooms" and a question mark icon. Below the search bar, there are two expandable sections: "Core" and "Frontend".

Check out the settings that you want to deploy (checked by default) and click **Deploy selected changes**

Changes Overview

You have 1 changed settings which will be deployed in this run. [Switch to advanced mode to deploy settings changed by other users, too.](#)

☒ Ticket::Frontend::AgentTicketZoom###DynamicField

Frontend::Agent::View::TicketZoom

OPWorkPackageId	→	1 - Enabled
ReservationAdditionalDescription	→	1 - Enabled
ReservationID	→	1 - Enabled
ReservationIsManagerPresent	→	1 - Enabled
ReservationNumberOfPeople	→	1 - Enabled

Deploy selected changes

or [Cancel](#)

Write a comment about the changes that you made and click **Deploy now**.

From now on, information saved in the added dynamic fields will be visible in the ticket, in the "Ticket details".
