

Button

Button (button)

download PDF *example:*

```
{
  "mode": "PDF",
  "pdf_action": "download",
  "question_label": "{questionLabel}",
  "answer_label": "{answerLabel}",
  ...
}
```

submit form *example:*

```
{
  "mode": "submit"
  ...
}
```

clone fields *example:*

```
{
  "mode": "clone",
  "clone_additional_shift": -1,
  "clone_fields": [
    {
      "id": "textField1"
    },
    {
      "id": "textField2"
    }
  ],
  ...
}
```

mode

submit

This mode allows you to send a form. It has no additional configuration options.

clone (beta)

This mode was created so that any number of fields can be copied. Imagine you are creating a form where someone has to add their cars (we don't know how many cars there are)

> Virtual panel 1 title

Thanks to this solution, the person filling in the form can click the button to copy any number of fields.

+48 123 321 123

Field identifiers will be generated according to the following pattern:
field name _ clone number _ internal number

Car
Nissan Note

registration number
WA4443

Full example:

Car Registration number

```
{
  "size": "s12 m6",
  "type": "text",
```

```

        "id": "carModel",
        "label": "Car",
        "icon": "drive_eta",
        "validate": [
            "required"
        ],
        "hidden": false,
        "value": ""
    },
    {
        "size": "s12 m6",
        "type": "text",
        "id": "carType",
        "label": "Registration number",
        "icon": "directions_bus",
        "validate": [
            "required"
        ],
        "hidden": false,
        "value": ""
    },
    {
        "size": "s12 m12 center",
        "type": "button",
        "id": "clone_btn",
        "mode": "clone",
        "label": "Add next car",
        "clone_additional_shift": -2,
        "clone_fields": [
            {
                "id": "carModel"
            },
            {
                "id": "carType"
            }
        ]
    }
}

```

clone_additional_shift

Where are the new cloned fields to appear. Enter the number of fields from the button e.g. -1, then the fields will appear before the button.

The mechanism takes both positive and negative numbers.

clone_fields

List of cloned fields. Here you give a list with the ID of the fields you want to copy.

PDF

The PDF field allows you to generate a PDF printout of the entire form. You can download the file, print it or just open it in a new tab.

Example PDF

To generate a PDF file, you must have a field with the id "OTRS_Ticket_Title" this field will be set as the print title.

Question	Answer
Registration number	10 12345
Your name	John Example

pdf_action

In this parameter you set what should happen to the generated file, you have several options available:

- open
- print
- download

question_label

title of the first column of the resulting file.

answer_label

the title of the second column of the resulting file.

redirect

The redirection button. When you click it will take you to any other site.

redirect_type

Type of redirection, available:

- **newWindow** - redirection to the address in the new tab
- **redirect** - redirection in the current card

redirect_url

An address to redirect.

version >= 1.2.9

The system allows you to add the `SessionID` and `LANG` parameter to the url (the parameters are automatically set based on the current).

```
{
  "size": "s12 m12 center",
  "type": "button",
  "id": "redirect_with_session",
  "mode": "redirect",
  "label": "Redirect with session",
  "redirect_type": "newWindow",
  "redirect_url": "https://google.pl?SessionID=${SessionID}&lang=${LANG}"
}
```

Such a setting will redirect to the following link: `https://google.pl?SessionID=123123&lang=en`

The rest of the available parameters:

This field supports all parameters with ["Attributes available for each field"](#).
