

CKEditor

CKEditor (ckeditor)

The CKEditor field allows you to display an advanced text editor. This editor can be configured according to the CKEditor documentation.

Example:

```
{
  "size": "s12 m12",
  "type": "ckeditor",
  "id": "ckEditor",
  "label": "CKEditor",
  "validate": [
    "required"
  ],
  "icon": "fingerprint",
  "hidden": false,
  "value": "Your text..."
}
```

```
"config": {  
  "language": "en"  
}
```

config

Here you can use all available ckeditor settings

You can set up a lot of items that you will find in the official CKEditor documentation. An example parameter is **language**, which will change the language of the text editor.

Smart WYSIWYG HTML editor

Approved by millions. Fully customizable.
Number #1 rich text editor with the most features.

Demos
