

# File activating the form and setting the order in HUB

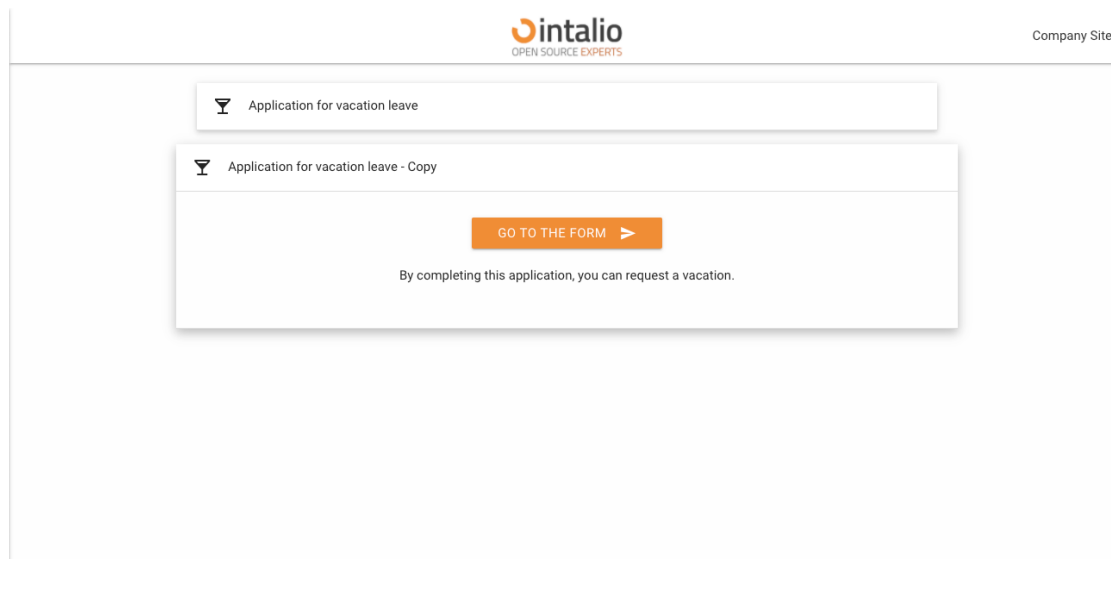

This topic refers to the file static/FORMS/config.json.

```
[  
  "ExampleForm1.json",  
  "ExampleForm2.json",  
]
```

This file is responsible for form activation and the order of forms in the HUB.

Every form you want to see in the menu must be entered here (even if it is hidden in the HUB).

The order of the forms on the list corresponds to the order in the HUB.

The screenshot shows the Intalio Company Site interface. At the top, the Intalio logo (an orange circle with a white 'i') and the text 'intalio OPEN SOURCE EXPERTS' are on the left, and 'Company Site' is on the right. Below the header, there is a list of forms. The first form is titled 'Application for vacation leave' and has a small icon of a person. Below it is a second form titled 'Application for vacation leave - Copy', also with a person icon. Below the second form, there is an orange button with the text 'GO TO THE FORM' and a right-pointing arrow. Below the button, there is a line of text: 'By completing this application, you can request a vacation.'
