

Form configuration - virtual panels

The screenshot shows a web form interface. At the top, there is a header with the 'intalio' logo (an orange 'i' followed by 'ntalio' in black) and the tagline 'OPEN SOURCE EXPERTS' in small red letters. To the right of the logo is the text 'Company Site'. Below the header is a dark grey bar with a white right-pointing arrow and the text 'Virtual panel 1 title'. Below this bar, there are two circular navigation buttons: a grey one with a left arrow and a green one with a right arrow. The form itself has two input fields. The first field is labeled 'Your name *' with a red asterisk, and it contains the text 'John Example' next to a person icon. The second field is labeled 'Phone number' and contains the text '+48 123 321 123' next to a phone icon. Both fields have horizontal lines below them indicating input areas.

Virtual panels allow, for example, to separate thematic sections. If your form is long, you can use virtual panels to separate it into smaller sections.

If there is one virtual panel in your configuration, the form will be displayed normally. If you add more, additional buttons will appear at the top of the page to navigate through the virtual panels.

Remember to add a button on the last panel allowing you to send the form!

After filling in the form and pressing the send button (or if there is an error before sending), all panels will be merged for easier verification.

Example:

```
{
  "default_lang": "en",
  ...
  "panels": [
    {
      "name": "Panel 1 TITLE",
      "fields": [
        {
          //Field1
        },
        {
```

```
        //Field2
    },
]
},
{
    "name": "Panel 2 TITLE",
    "fields": [
        {
            //Field3
        },
        {
            //Field4
        },
    ]
},
{
    "name": "Panel 3 TITLE",
    "fields": [
        {
            //Field5
        },
        {
            //Send Button
        },
    ]
},
}
```
