

# Configuration

Log in to the Zimbra Administration Console. The ZI-SecurityIncident configuration panel is available on **Main Page -> Migration and tools -> ZI-SecurityIncident**

**Zimbra Administration**  
A SYNACOR PRODUCT

Home - Tools and Migration - ZI-SecurityIncident

**Tools and Migration**

- Downloads
- Account Migration
- Software Updates
- Client Upload
- ZI-Piler
- ZI-LicenseSystem
- ZI-SecurityIncident**

**Email settings**

|  |  |
|--|--|
| From   |  |
| Internal email address   |  |
| To   |  |
| Subject  |  |
| Names of attachments   |  |
| This name will be used to create file names such as dangerous_email.7z |  |
| Content  |  |

**Archive password settings**

|  |                                     |
|--|-------------------------------------|
| Password is the current date   | <input checked="" type="checkbox"/> |
| Date format  |                                     |
| y = year (yy year yyyy)<br>M = month (MM)<br>d = day in month (dd)<br>h = hour (0-12) (hh)<br>H = hour (0-23) (HH)<br>m = minute (mm)<br>z = timezone (e.g. Pacific Standard Time...)<br>Z = timezone (e.g. -0800) |                                     |
| Static password  |                                     |
| If the password is not a date - enter a static password.   |                                     |

**System for generating message preview**

|  |                                     |
|--|-------------------------------------|
| Generate secure message preview                | <input checked="" type="checkbox"/> |
| Delete unsafe code from preview                | <input type="checkbox"/>            |
| e.g. executable scripts                        |                                     |
| Display images from external sources           | <input checked="" type="checkbox"/> |
| Display images already processed by the system | <input checked="" type="checkbox"/> |

## Email settings

- **From** - sender of the notification email
- **To** - recipient of the notification email
- **Subject** - subject of the notification email
- **Names of attachments** - names of the unsafe attachments
- **Content** - content of the message
